Organizational Readiness for a Data Analytics Program

- How many data sources do you collect?

- What questions your Data Science team is trying to answer?

- What are the important factors driving your office?

- Do you have an understanding of future conditions? Are you able to predict future behaviors based on past observations?

- What is the best course of action to take for your key decisions?

- What is the right blend of talent for your data science team – domain expertise, computer science, mathematics?

- Do your data scientists:
  - Have the technical know how?
  - Have a "can do" attitude in a client/customer focused environment?
  - Have critical thinking skills and are willing to learn?
  - Have the right motivation and a creative nature?
